

I-91 Hartford Bridges SURVEY & Project Update

Hello,

Since April, the project team has provided information weekly about a complex project to replace two aging I-91 bridges over Route 5 in White River Junction. While some of you have written emails or telephoned about the project, we would like to hear more feedback from those who followed the construction. The project may have affected your daily commute to work, running errands or conducting your business. Perhaps you found watching the project unfold interesting and have ideas on how you would like VTrans to share information about other transportation projects. Please take a few minutes to respond to a brief survey so we can consider your views when planning future projects. Click this survey link: www.surveymonkey.com/r/I_91_Hartford_Bridges.

Next week's work schedule: Work related to the bridges is complete. All that remains is work related to the reconnection of the Town's water line along US Route 5.

Please exercise caution while driving through the work zone.
